Description

A watercolour drawing by DCointrel is recognisable at first glance! Influenced by Expressionism in his drawings, this watercolourist is known for his monochrome or colour female portraits.
"Moments Vol,s" brings together his most recent paintings with bewitching colours. Women, models who really exist as if to better capture the secret of unique charm. Often pensive, sitting or sleeping, DCointrel's female portraits give the impression that a respectful gaze is laid on these women. Certainly, the gaze of a man under the charm of their melancholic beauty.
